Appl. No. 09/464,855
Preliminary Amdt. 1/12/06

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

Claims 1-22 (canceled)

Claim 23 (New) A method of playing audio files comprising:

listing a set of audio files including a current audio file, where at least some of the audio files have an introductory portion;

enabling a navigating input having a first speed and a second speed;

enabling a feedback output to selectively provide at least a first type of auditory feedback utilizing the introductory portion when the navigating input operates as the first speed, and a second type of auditory feedback when the navigating input operates at the second speed, and

enabling a validating input to enable the user to select the current audio file in response to the feedback output.

Claim 24 (New) A method as set forth in claim 23, wherein the second speed is relatively faster than the first speed.

Claim 25 (New) A method as set forth in claim 23, wherein the step of listing includes providing a wheel and rotating a wheel to enable a user to select the current audio file.

Claim 26 (New) A method as set forth in claim 23, wherein the step of listing includes providing a wheel and rotating the wheel to enable a user to select the current audio file and the step of enabling a navigating input includes pressing the wheel.

Claim 27 (New) A method as set forth in claim 23, wherein the step of listing includes providing a wheel and rotating the wheel to enable a user to select the current audio file and the step of enabling a navigating input includes sliding the wheel.

Appl. No. 09/464,855
Preliminary Amdt. 1/12/06

Claim 28 (New) A method as set forth in claim 23, wherein the step of listing includes providing a wheel and rotating the wheel to enable a user to select the current audio file and the step of enabling a validating input includes pressing the wheel.

Claim 29 (New) A method as set forth in claim 23, wherein the step of listing includes providing a wheel and rotating the wheel to enable a user to select the current audio file and the step of enabling a validating input includes sliding the wheel.

Claim 30 (New) A method for using a telephone having a navigation wheel interface, comprising:

        providing an interactive user-interface with a navigation wheel for enabling the user to navigate a set of options;

        storing audio information corresponding to at least some of the options of the set of options, the audio information including a user-spoken word;

        selecting a current option with the navigation wheel; and

        sounding a first type of audio feedback in the form of the user-spoken word corresponding to the current option when the navigation wheel operates at a first speed and sounding a second type of auditory feedback when the navigation wheel operates at a second speed.

Claim 31 (New) A method as set forth in Claim 30, further comprising dialing a phone call corresponding to the current option.

Claim 32 (New) A method as set forth in claim 30, wherein the second speed is relatively faster than the first speed.

Claim 33 (New) A method as set forth in claim 30, wherein the step of listing includes rotating the wheel.

Claim 34 (New) A method as set forth in claim 30, wherein the step of listing includes rotating the wheel and the step of selecting includes pressing the wheel.

Claim 35 (New) A method as set forth in claim 30, wherein the step of listing includes rotating the wheel and the step of selecting includes sliding the wheel.
